WORK EXPERIENCE

Lead Developer
University of South Florida, Tampa, FL

July 2020 - Present

Front End Developer
University of South Florida, Tampa, FL

June 2017 - July 2020

- Represent technical team in collaboration with leadership and project members across multiple departments on the development, design, and implementation of websites, web applications, and user interfaces
- Lead in the development of web strategy to drive course/program enrollments and oversee the technical implementation of that strategy. Work with University Communications and Marketing and IT to ensure that all sites meet university web and brand standards
- Administer enterprise CMS, CRM, and marketing automation software
- Mentor team of junior developers, providing guidance, advice and training
- Develop templates and standards, directing efforts to improve the usability, design, content and conversion rates of all unit sites
- Analyze customer technical needs, producing technical specifications and supporting through completion of the project. Research new technologies and builds working prototypes based on future goals
- Manage development, maintenance, and testing of client websites, landing pages, and web applications supported by department

Web Coordinator
Vertafore, East Lansing, MI

May 2015 – May 2017

- Managed all web properties for Vertafore's Sircon solutions group, working cross-functionally across several departments through the use of collaboration tools such as JIRA, Confluence, Slack and Trello
- Oversaw planning, design and launch of several redesigned and rebuilt fully responsive Vertafore sites and unique campaign and event landing pages, handcoding as sole developer
- Improved and simplified site change and update process by creating reusable site components and page templates, using version-controlled codebase
- Monitored site analytics, implementing and utilizing several Google Analytics Solutions, including Analytics reports, Tag Manager, Search Console and Webmaster tools

Senior Web Developer
SNworks, East Lansing, MI

Sept 2013 – May 2015

- As part of the SNworks team, handled new site builds and redesigns working from Photoshop document design comps with specifications, along with ticket requests for The State News site as well as more than 20 other university sites across the country utilizing responsive website design
- As a Senior Developer, reviewed and approved submitted code for QA, deployed code and assets to live sites, tracked issues and projects in agile workflow with Jira and Basecamp
- Developed websites using Bootstrap responsive framework, HTML5, CSS3, LESS, Grunt, and Twig. Git and Bitbucket used for version control
- Utilized SNwork's proprietary content management system

Programmer Analyst Intern
Kohl's Corporate, Milwaukee, WI

May – Aug 2014
